Kiersten Lyde-Stad

Combined Major in Computer Science and Statistics, 4th Year
klyde-stad@outlook.com | (604) 603-4429 | https://github.com/klydestad
https://www.kierstenly.dev/ | www.linkedin.com/in/kierstenly/

TECHNICAL SKILLS

Programming Languages:	Python, R, SQL, Java, C++, C, C#, TypeScript, LaTeX
Data Science & ML:	scikit-learn, pandas, NumPy, Matplotlib, Jupyter, MATLAB, Power BI, Fabric
Web Development:	JavaScript, Node.js, HTML, CSS, .NET, Streamlit
Tools & Platforms:	Git, GitHub, Azure DevOps, SQL Server/SSMS, Power Platform, SharePoint, Logic Apps, Excel, Cloudflare, Workday
Testing & Development:	JUnit, JSON, Mocha, Chai, Selenium, REST APIs
Environments:	Visual Studio, VS Code, IntelliJ IDEA, Overleaf

WORK EXPERIENCE

Software Developer Part-time Contractor | Terra Dygital Solutions Inc. Sep 2026–Present

- Built data pipelines in Microsoft Fabric and extended C#/.NET automation tool for API integration and data validation
- Gathered client requirements and maintained technical documentation

Developer Co-op | Terra Dygital Solutions Inc. Jan–Aug 2026

- Engineered data pipelines in Microsoft Fabric with SQL Server, Power BI dashboards, and Azure Logic Apps across three clients
- Developed Power Query transformations for reporting templates and data-driven applications with backend integration
- Extended C#/.NET application architecture and built Python/C# automation pipeline (Selenium) for third-party data extraction and SQL Server loading
- Gathered requirements through client meetings and produced technical documentation

Indigenous Procurement Administrator Co-op | UBC Finance Jan – Aug 2024

- Optimized Excel business directory, migrated to SQL for security and scalability, and streamlined supplier information gathering process
- Led data collection and analysis for UBC's Canadian Supply Chain Act report, assessing supply chain risks of forced/child labor
- Conducted and analyzed Workday Report and Excel spend data to reach Indigenous spending goals, identify procurement opportunities, and track KPIs
- Development and documentation of standard operating procedures and business plans for various projects

Swim Instructor/Lifeguard | North Vancouver Recreation & Culture Sep 2019 – Jan 2024

- Collected and analyze pool chemistry data, communicating with coworkers to adjust pool chemistry
- Utilized Excel and PerfectMIND software for swim skills tracking and lessons scheduling

TECHNICAL PROJECTS

Indigenous Business Directory | UBC Finance Jan–Aug 2024

- Development, optimization, and maintenance of Excel business directory
- Migrated Excel directory to SQL, improving scalability and data security
- Automated supplier data collection with Qualtrics surveys, reducing manual entry
  Technologies: SQL, Excel, Qualtrics

SympFlaura: Symptoms & Flareup Tracker | Machine Learning May 2025–Present

- Developed ML model with scikit-learn to predict chronic illness flareups from user symptom inputs
- Deployed as a secure Streamlit app with authentication, improving accessibility and persistence
  Technologies: Python, Streamlit Authenticator, scikit-learn

Portfolio Website | Web Development Jun 2024–Present

- Developed a personal portfolio website to showcase projects and skills
- Optimized interface for usability and aesthetics, showcasing technical work effectively
  Technologies: HTML, CSS, JavaScript, VS Code

TECHNICAL PROJECTS (continued)

Pool Chemistry Logbook | Software Construction — Dec 2023

- Developed a Java tool to digitally track pool chemistry with exception alerts and data persistence
- Designed an intuitive UI to simplify monitoring and historical review of chemical levels

Technologies: Java, JUnit, JSON, IntelliJ IDEA

Pool Chemistry Diagnostic Tool | Data Analysis — Jun 2023

- Created Python functions to evaluate chlorine levels and recommend dosage adjustments
- Proposed adoption to replace manual logging, reducing human error in pool maintenance

Technologies: Python, Jupyter, GitHub

Vehicle Theft Rates Analysis | Statistical Inference — Apr 2023

- Performed hypothesis testing and bootstrap confidence intervals on theft data in R
- Summarized results in a final report highlighting significant theft trends

Technologies: R, Jupyter, GitHub

Heart Disease Symptom Analysis | Data Science — Dec 2022

- Built regression model linking symptoms with age, validating results with statistical tests
- Led collaborative workflow with GitHub, streamlining team contributions

Technologies: R, Jupyter, GitHub

Resonant Frequency vs. Temperature Analysis | Data Science, Physics — Jan–Mar 2022

- Analyzed trumpet frequency data with Excel and SpectrumLab to assess the impact of heat
- Identified statistically significant results, contributing to physics coursework research

Technologies: Excel, SpectrumLab

VOLUNTEER EXPERIENCE

Science One Mentor | UBC — Sep 2022 – April 2023

- Providing guidance to first-year students in UBC's accelerated Science One program

Non-Commissioned Officer | St. John Ambulance — Sep 2016 – 2022

- Teaching and evaluating emergency first aid skills to children ages 5-15

Science Conference Moderator & Participant | UBC Science One — Mar 2022

- Presented research findings and facilitated discussions in two-day scientific conference

Flute and Ensemble Lessons | Community & Private — Sep 2016 – Present

- Tutoring, leading ensemble clinics, and conducting junior concert bands

EDUCATION

B.Sc. Combined Major in Computer Science and Statistics, 4th Year — Expected Graduation May 2027
University of British Columbia, Vancouver, BC

CERTIFICATIONS

Standard First Aid & CPR/AED C — Jun 2025
Workplace Hazardous Materials Information System Training — Feb 2024
National Lifeguard Pool Option — Jul 2023
WHMIS for Workers — May 2023
WorkSafe BC Workplace Safety — Feb 2019
